## Education

---

### Greater Noida College , AKTU

Bachelor of Technology in Computer Science

Expected May 2027

Greater Noida , Uttar Pradesh

- **Relevant Coursework:** Data Structures and Algorithms (C++), Prob & Stat in CS (Python), Intro to CS II (C++), Linear Algebra w/Computational Applications (Python)

## Experience

---

### GreenCreon LLP

Flutter Intern

July 2025 – October 2025

Remote

- Designed and developed scalable cross-platform mobile application interfaces using Flutter, delivering responsive and visually consistent experiences across Android and iOS devices.
- Integrated RESTful APIs, implemented efficient state management solutions, and optimized dynamic UI rendering to improve application performance and user engagement.
- Collaborated closely with backend developers and remote teams to validate API responses, resolve integration issues, and ensure seamless end-to-end functionality.
- Refactored reusable widgets and modularized application architecture, significantly improving maintainability, scalability, and development efficiency.
- Performed debugging and performance optimization using Flutter DevTools, reducing UI lag, improving app responsiveness, and enhancing overall user experience.

### SOS 42

Flutter Developer Intern

February 2026 – April 2026

Remote

- Developed feature-rich Flutter applications with clean architecture principles, reusable components, and adaptive UI designs for improved scalability and maintainability.
- Implemented API integrations, asynchronous data handling, and state management techniques to build smooth, high-performance mobile experiences.
- Enhanced application stability by identifying and fixing UI, navigation, and runtime issues, resulting in improved usability and reduced crash scenarios.
- Optimized application workflows and frontend logic to improve rendering speed, responsiveness, and overall application efficiency.
- Worked in a collaborative remote development environment, participating in technical discussions, feature planning, testing, and iterative product improvements.

## Projects

---

### ClgJone App – Flutter , Dart , Firebase , Cloud Firestore , Firebase Authentication

- Built a cross-platform student utility application providing centralized access to academic resources such as notes, updates, and announcements with real-time data sync using Firebase.
- Integrated Cloud Firestore for real-time data synchronization across multiple users and devices.
- Implemented Firebase Authentication to enable secure login and personalized user access.
- Developed a scalable cloud-based backend to handle dynamic data efficiently.
- **Highlights:** Real-time sync with Firestore , Secure authentication system ,Centralized academic resource platform Scalable backend architecture ,User-tested with continuous improvements

## Face Recognition Attendance App – Flutter, Python, OpenCV, Flask, Firebase

- Built an automated attendance system leveraging facial recognition for secure, contactless tracking.
- Used Haar Cascade and deep learning models with Flask backend and Firebase for cloud storage.
- **Highlights:** Secure face authentication, real-time tracking, multi-platform support, automated reporting.

## Lucid AI (AI Roadmap Chatbot) – Python, TensorFlow, Flutter , Firebase

- Designed an interactive chatbot delivering personalized learning roadmaps across AI/ML, NLP, and web development.
- Utilized LLMs and TensorFlow for NLP, backend with Firebase for cloud services.
- **Highlights:** Personalized AI learning, modular roadmap, dynamic web links, secure session management.

## Shopping App – Flutter, Dart, Firebase, Stripe

- Developed a mobile e-commerce platform with product browsing, cart, and secure payment integration.
- Implemented Firebase backend for inventory and order sync, integrated Stripe for PCI-compliant payments.
- **Highlights:** Real-time product sync, PCI-compliant payments, scalable backend, personalized user experience.

## Technical Skills

---

**Languages:** Dart, Python, C, C++, Bash (Basic)

**Development:** Flutter, REST API Integration, State Management, Responsive UI, Cross-Platform App Development

**Backend & Cloud:** Firebase, Cloud Firestore, Firebase Authentication, Flask, MySQL

**AI & Computer Vision:** TensorFlow, OpenCV, Facial Recognition, AI Chatbot Development

**Tools:** Git, GitHub, Docker, Postman, Android Studio, VS Code

**Core Concepts:** DSA, Scalable Architecture, Real-Time Data Sync, Debugging, Performance Optimization
